Art Unit: 2633

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 5-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Akasaka et al (6,654,162).

Akasaka et al discloses all of the limitations of claims 1 and 11 (see claim 17, claim 45, Figs. 1-2 of Akasaka et al).

Akasaka et al discloses all of the limitations of claims 2, 3, 12 and 13 (see line 66 of column 12 to line 10 of column 13; lines 2-42 of column 21).

Akasaka et al discloses all of the limitations of claims 5, 7, 9, 10 and 17 (see Abstract).

Akasaka et al discloses all of the limitations of claims 6, 8, 15 and 20 (see line 45 of column 1 to line 5 of column 2).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

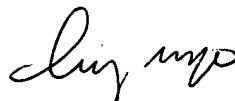

Art Unit: 2633

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Akasaka et al (6,654,162). The ranges of wavelengths recited in claim 4 is typical operating wavelengths in an optical communication system. Therefore, it lacks novelty.
